## EDUCATION

### University of Wisconsin – Madison

Master of Science in Computer Science | GPA: 3.83/4.0 01/2026 – 05/2027  
Relevant Coursework – Algorithms, Machine Learning, Dynamic Programming, Software Engineering

Bachelor of Science in Computer Science and Data Science | GPA: 3.62/4.0 09/2022 – 12/2025  
Relevant Coursework – App Development, UI/UX, Databases, Python Programming, Artificial Intelligence, Data Visualization

Certifications – Google Data Analytics Professional Certificate, IBM Data Science Professional Certificate  
Clubs – Badger Solar Racing Club, Race Strategy Team: modeled optimal racing lines and target speeds for real time driver strategy

## EXPERIENCE

Research Assistant 09/2025 – Present  
Wisconsin School of Business

- Engineered a Qualtrics-integrated AI agent to execute shape generation/selection tasks using user prompts for 100+ participants.
- Built a low-latency Python, LLM, and JS pipeline to translate natural language into geometric actions for performance scoring.
- Designed a platform for 30+ PhD students to generate demographic-conditioned LLM survey responses, supporting rapid experimentation. Reduced time and costs spent on questionnaire testing by upto 60%.

Frontend Developer Intern 05/2025 – 08/2025  
ai-horizon.io

- Collaborated with other interns to design and develop the company website with 50+ UI pages and 20+ custom animations.
- Integrated backend APIs to build dynamic blog and news pages, and developed an admin panel for real-time content management.
- Integrated an AI chat bot for instant answers and 24/7 support, improving engagement by 23%. Built using the MERN stack.

Teaching Assistant 01/2025 – 05/2025  
Wisconsin School of Business

- Prepared and graded lecture materials, assignments, projects and exams for 60+ students. Held weekly office hours.
- Led discussion sections on the end-to-end ML cycle, walking through real life case studies and filling in for delivering lectures.

Machine Learning Intern 05/2024 – 08/2024  
Reliance Jio

- Deployed a decision tree regression model to predict battery backup durations for data centers statewide with 91% accuracy.
- Processed daily updated operations data and applied grid search CV, VIF analysis and pruning to reduce model complexity.
- Presented improved maintenance scheduling for high risk sites to stakeholders, reducing system downtime by 15%.

## PROJECTS

### Wisconsin Case Lab – Convex | Svelte | Tailwind CSS

- Developed a multi-agent case simulation platform supporting 70+ concurrent students, 8+ role-based personas, and 12+ case studies, enabling students to interview stakeholders, unlock case files, and gather evidence for business recommendations.
- Built persona referral, document retrieval, and LLM-based report grading workflows to evaluate student submissions with automated feedback. Integrated an admin panel for per-case ownership/collaborator access control and roster management.

### Iris – PostgreSQL | FastAPI | React | Tailwind CSS | DigitalOcean

- Developed an internal project management tool for DataCEVA, enabling client-specific ticket tracking through Kanban boards.
- Implemented authentication with separate employee and client workflows, dedicated views, and role-specific functionality.
- Integrated Slack APIs to tag tickets to workspaces and added AI-powered automated messages, improving productivity by 19%.
- Engineered a project analytics dashboard to track time against targets and employee-level breakdowns, improving client billing accuracy by 35%.

## SKILLS

Languages: Python, TypeScript, Javascript, SQL, R, MATLAB, Java  
Frameworks: React, Svelte, PyTorch, Scikit-Learn, TensorFlow, FAST API, Flask, Node.js, Express  
Tools and Platforms: Azure, Git, Power BI, Github, Docker, AWS, Linux, Jira, Neon, Digital Ocean  
Databases: MySQL, PostgreSQL, MongoDB, Convex
